COMPANY PROFILE

Gulf Tech MEP Training Centre is a leading MEP/CIVIL BIM Modeling Training Centre in India. We have prominent skills in MEP designing & drafting with foolproof expertization and execution in Gulf countries.

M/s Gulf Tech was established in 2014 as a partnership between a number of qualified engineers specialized in Civil, Electrical and Mechanical fields related to building service industry. In a decade, M/s Gulf Tech has established itself as a renowned institution of expertise and excellence in the construction field. We have already established our presence in Bengaluru and Coimbatore. Most of our students have settled their careers in their core fields in India & Abroad.

WHY GULFTECH?

Every year, many students complete their professional degree from technical institutions with high marks. Gulf countries always demand candidates with professional degrees and a handful of experience in MEP and CIVIL sectors. To get experience in the MEP/CIVIL sector, students need to join companies as trainee and earn experience through many years. This is a difficult and tiresome process. Gulftech will help the students to bypass this tiresome process and our professionals will train them to be an expert in a short span of time. Our dominance in overseas experience in design, drafting, and execution of various real projects will make them skilled, similar to an experienced person.

OUR VISION & MISSION

To build MEP/CIVIL professionals through a systematic and quality training process and thus become the world-class leader in MEP/CIVIL sector.

To provide training and build MEP/CIVIL BIM Modelers in such a way that they can enter into the industry and build a successful career in a short span of time.

SCOPE OF MEP/ CIVIL BIM MODELING

In today's world of architecture and building, complex buildings are being constructed day by day. Tall structures have even become the icon of development of any country. This shows the great importance given to construction-related jobs with efficient and experienced MEP/Civil professionals.

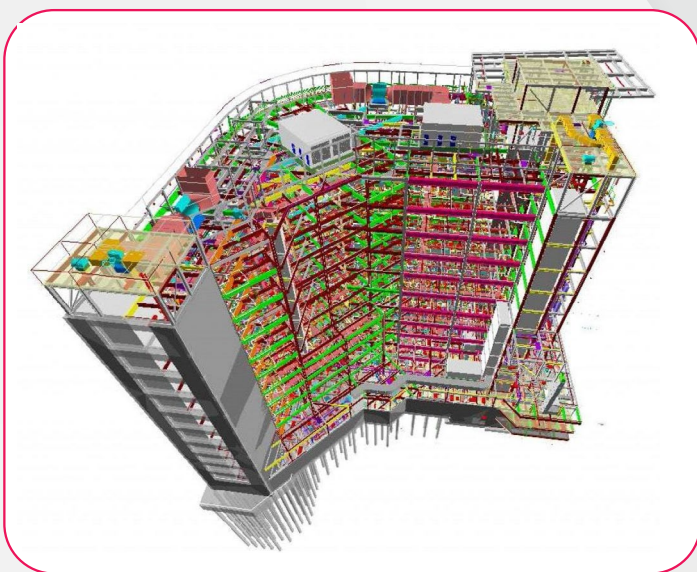

BIM (Building Information Modeling)

Across the world, BIM is a crucial and mandated process to ensure the planning, design and construction of buildings is highly efficient and collaborative. A good BIM model can include part and material-based information as well as geospatial, financial, procurement and logistic information.

As we know, a lot of new projects were announced especially in the Gulf Countries. This created a large number of BIM Modeler vacancy in construction companies & outsourcing companies.

TRAINING PROGRAMS

BIM MODELING (Gulf Job Training)

Mechanical BIM Modeling

Electrical BIM Modeling

Structural BIM Modeling

Architectural BIM Modeling

Qualification : B.Tech/Diploma (Mech/EEE/ECE/Civil)

INTERNSHIP PROGRAMS

**JOB TRAINING
PROGRAMS**

**JOB TRAINING WITH
GCC PACKAGE**

OUR HIGHLIGHTS

- Training based on overseas real projects
- Systematic and quality training
- The best in class office facilities
- Online & Offline classes
- Saturday class for B-Tech & Diploma ongoing students
- Internship programs for ongoing & course completed students
- Accommodation assistance for the required
- India & Abroad placement guidance
